SUMMARY

Full-Stack AI Engineer with **4+ years** of experience building **production agentic AI systems**, **scalable backends**, and **real-time UIs** across **financial services** and **enterprise platforms**. Engineered a **multi-agent LangGraph + AWS Bedrock orchestration platform** that eliminated **\$2.4M** in annual manual processing costs and reduced **trade exception cycle time by 65%**. Skilled in **LangGraph**, **RAG pipelines**, **FastAPI**, **React 18**, **Java Spring Boot**, and **cloud-native CI/CD**, with a proven track record of delivering **high-impact AI solutions** and mentoring **cross-functional engineering teams**.

EXPERIENCE

Morgan Stanley | *Software Engineer – AgenticAI and Full Stack* Aug 2025 – Present

- Designed **multi-agent LangGraph** workflows with **tool-calling**, **agent memory**, **AWS Bedrock** to auto-resolve trade exceptions, reducing manual intervention by **65%** and eliminating an estimated **\$2.4M** in annual manual processing costs.
- Implemented **RAG pipelines with LangChain, FAISS, OpenAI Embeddings**, and **prompt engineering** over **10M+ documents**, cutting analyst lookup time from **8 minutes to under 90 seconds**.
- Architected **event-driven FastAPI microservices** on **AWS ECS/Fargate** with **Redis, OAuth2/JWT, async task queues**; achieved **99.97% uptime** across 8 services.
- Shipped **React 18 + TypeScript** real-time trading dashboards using **D3.js, WebSocket feeds**; reduced trader decision latency by **45%** for 200+ fixed-income users.
- Fine-tuned **BERT** with **spaCy** for entity extraction and trade-memo anomaly detection; improved model precision by **38%** vs rule-based baseline.
- Built **CI/CD pipelines** via **GitHub Actions + AWS CodePipeline** with **Datadog LLM traces, SonarQube, pytest** gates; cut deployment cycle time by **50%**.

Sage Softtech | *Software Engineer 2* Oct 2021 – Jul 2023

- Architected **Java Spring Boot** REST microservices with **Kafka event streaming** handling 500K+ daily transactions; cut API response time by **40%** via connection pooling.
- Deployed **scikit-learn** ML anomaly detection service on **GCP Cloud Run** with Python REST wrapper; processed **1M+ events/day** cutting fraud false-positives by **30%**.
- Built reusable **React 17 + Redux Toolkit** component library with **Material UI + Jest**; delivered 10 features across 4 sprints, reducing QA bug cycle by **45%**.
- Optimized **PostgreSQL** schemas and complex joins with **Flyway migrations** on **GCP CloudSQL**; reduced report generation time from 14s to **2.1s** (85% faster).
- Served as Agile tech lead for 5-member squad; mentored 3 engineers, reviewed 120+ PRs, and drove **Grafana + Prometheus** observability adoption, reducing incident MTTR by **32%**.

Sage Softtech | *Associate Developer* Feb 2021 – Sep 2021

- Built **RESTful APIs** in **Java Spring Boot** for customer onboarding processing 10K+ daily records; fixed 40+ bugs, improving endpoint reliability by **22%** via **ELK Stack**.
- Implemented **React functional components + React Router** for 3-module internal portal, reducing page load time by **30%** via lazy loading and code-splitting, validated with **Lighthouse audits**.
- Automated data migration from **MySQL to PostgreSQL** using **Python scripts**, validating 500K+ records for schema compliance while creating runbooks adopted by the infrastructure team.

SKILLS

Languages: Python, TypeScript, JavaScript, Java, SQL

Agentic AI / GenAI: LangGraph, LangChain, AWS Bedrock, Agentic AI, Multi-Agent Orchestration, Retrieval-Augmented Generation (RAG), OpenAI Embeddings, Prompt Engineering, FAISS, spaCy, BERT, scikit-learn, NLP

Backend Technologies: FastAPI, Node.js, Express.js, Flask, Java Spring Boot, Hibernate, REST APIs, GraphQL, Microservices, Kafka, OAuth2, JWT, WebSockets

Frontend Technologies: React 18, TypeScript, Redux Toolkit, D3.js, Material UI, React Router, Jest, React Testing Library

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Redis, FAISS (Vector Database), Query Optimization, Database Indexing, Database Migrations

Cloud & DevOps: AWS (Bedrock, ECS, Fargate, CodePipeline, CloudWatch), GCP (Cloud Run, CloudSQL), Docker, Terraform, Jenkins, GitHub Actions, CI/CD

Testing & Observability: pytest, Jest, SonarQube, Datadog (LLM Traces), Grafana, Prometheus, ELK Stack

Practices: Agile/Scrum, Code Reviews, System Design, Mentoring

EDUCATION

Rochester Institute of Technology (RIT)

Dec 2025

Master of Science in Computer Software Engineering | GPA: 3.94/4.0
